

## AUTHORISATION

Authorising Melody Sauce is simple, it just requires an internet connection and browser so you can connect to our servers.

When you load and open Melody Sauce for the first time, you should see the Authorisation window. Simply enter or paste the license/serial key provided to you by email into the authorisation window and click “OK”.

Melody Sauce is now ready for you to generate melodies.

Once authorisation has been completed successfully, an internet connection is no longer required to open Melody Sauce, so you can continue to use it offline.
